How Can a TMS Help You Manage your LTL Spend?

*By Dave Maddox, Senior
Vice President Sales Supply
Chain, nVision Global*

*Educating and Connecting the World's
Supply Chain Professionals.™*

Managing your LTL shipment spend can be difficult. Due to the complexity of LTL shipments and its pricing structure you may be spending more than you need and missing out on valuable margin dollars for your business. Many companies don't know how much they are truly spending and more importantly, how much they could potentially save. For small to mid-size companies that don't have a Transportation Team on staff, effectively managing your supply chain is full of challenges. Our experience shows that if you are actively shipping multiple LTL shipments a day, the manual process can become quite daunting for your existing shipping group.

8 THINGS A TMS CAN DO FOR YOU:

- **Get Multiple Quotes**
One-stop-ship
- **Tender Shipments**
Instantly book freight with one click
- **Print Bills Of Lading**
Automated shipment documents
- **Freight Claims & Auditing**
Catch and resolve misclassifications and billing errors
- **Real Time Visibility**
Real-Time track, trace, and Proof of Delivery information
- **Control Your Supply Chain**
Real-time data to help you analyze, manage, and forecast
- **Reduce Freight Spend**
Quickly select the best rates for each shipment
- **Elevate Your Supply Chain**
Improve service standards and overall profitability

Partnering with the right TMS vendor can help! nVision Global's Impact TMS is a cloud based, end-to-end supply chain management solution that offers you a comprehensive platform to help you take control of your supply chain. Impact TMS is geared toward small to mid-size shippers to help you gain visibility and control over the ever changing variables of today's transportation. Impact TMS's platform enables you to enter basic information such as origin, destination, and shipment characteristics and receive instant rate quotes from all of our regional and national LTL carrier partners. Impact TMS automates the quoting and tendering process ensuring that you are getting the best rate, along with track and trace information, on each shipment, at the touch of a button.

About CSCMP Hot Topics

Issues of *CSCMP Hot Topics* may include early results from ongoing research being conducted for CSCMP or other organizations; new supply chain practices, thought-provoking ideas, or emerging trends; discussions of changes in the broader business and regulatory environment that may impact the supply chain and logistics field.

Impact TMS also provides you with real time data that you can use to analyze, plan, forecast, and control your transportation budget. In today's ever changing competitive landscape, this is more important than ever. nVision Global can not only help you reduce your freight spend, but we can give you the tools, data, and expertise to elevate your supply chain to the next level and increase the profitability of your entire organization.
